UNITED
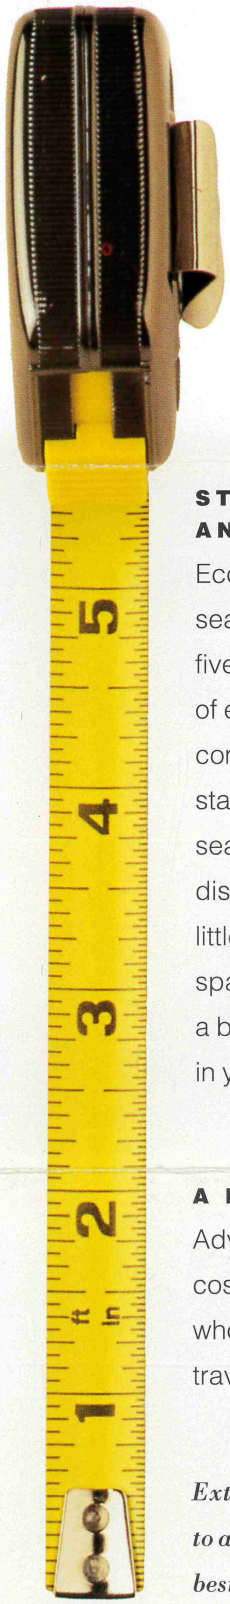
A STAR ALLIANCE MEMBER

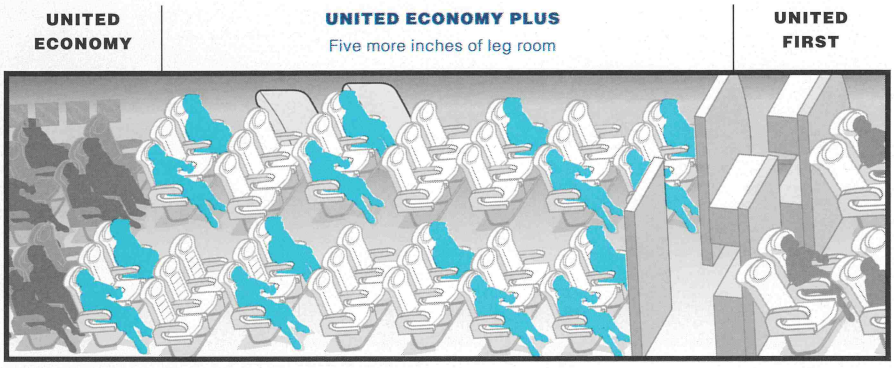
Now there's a big plus to economy air travel.



Introducing United Economy Plus. United Economy Plus is our response to customers' requests for more comfortable seating in the economy section. We are reconfiguring the first six to eleven rows of our United Economy cabins to dramatically increase legroom. We are proud to be the first U.S. airline to offer this unique product to our customers flying in North America.

STRETCH OUT AND RELAX

Economy Plus seating will offer five full inches of extra room compared to standard economy seating. You'll discover how a little bit of extra space can mean a big difference in your comfort.



A FLEET OF ROOMY SEATS

The number of seats available for any Economy Plus flight will vary from 36 to 89, depending on the type of aircraft. The fleet of approximately 450 planes includes 727s, 737s (excluding United Shuttle), 757s, A319s, A320s, 767-300s and 777As.

A REWARDING EXPERIENCE

Advance assignment of Economy Plus seating will be available at no extra cost on a first-come, first-served basis to United Mileage Plus® members who have Premier status or above, as well as Star Alliance Gold and Silver travelers and customers who have purchased a full fare economy ticket.

Extra space is just the beginning. United Economy Plus is one of many innovations we continue to introduce to all classes of service, on all of our flights. It is just another way United is trying to make your next flight your best ever. That's because we want to be your airline of choice. We look forward to having you travel with us.
